

Intense LED Flood light

Model:
KN20
Intense LED Flood light

Installation

- IMPORTANT - This unit should be installed by a Registered Electrician
- Power should be isolated at the switchboard before installing this unit
- The flood light should be wired via an independent light switch
- Observe the Phase and Neutral on supply cable markings

Location:

- For durability and maintenance it is preferable to mount the floodlight under an eave or be otherwise protected from direct weather exposure
- Consider mounting position to avoid direct glare into eyes
- Consider keeping appropriate distance between the flood light and delicate or flammable objects.

**DO NOT DISMANTLE, THIS UNIT HAS NO USER SERVICEABLE PARTS
IF FRONT GLASS IS BROKEN-DISCONTINUE USE OF LED FLOODLIGHT**

Model:
KN20
